AWS CloudShell Actions

ap-south-1

```
Preparing your terminal...
[cloudshell-user@ip-10-0-101-20 ~]$ Try these commands to get started:
aws help or aws <command> help or aws <command> --cli-auto-prompt
[cloudshell-user@ip-10-0-101-20 ~]$ aws help
AWS()

NAME
    aws -

DESCRIPTION
    The AWS Command Line Interface is a unified tool to manage your AWS
    services.

SYNOPSIS
    aws [options] <command> <subcommand> [parameters]

    Use aws command help for information on a specific command. Use aws
    help topics to view a list of available help topics. The synopsis for
    each command shows its parameters and their usage. Optional parameters
    are shown in square brackets.

GLOBAL OPTIONS
    --debug (boolean)
        Turn on debug logging.

    --endpoint-url (string)
        Override command's default URL with the given URL.

    --no-verify-ssl (boolean)
        By default, the AWS CLI uses SSL when communicating with AWS services.
```
